

RAHUL KUMAR

SENIOR FULL STACK DEVELOPER

+91 9015709221 — rk2655415@gmail.com — LinkedIn — GitHub — Portfolio

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building and scaling web and mobile platforms across FinTech, EdTech, SaaS, and enterprise domains, using MERN, Next.js, and React Native. Strong track record leading React Native architecture and version upgrades, building shared UI component libraries, and owning end-to-end mobile release cycles. Skilled at improving application performance, standardizing engineering practices, and mentoring developers.

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, Redux Toolkit, React Query, Tailwind CSS, styled-components
- **Mobile:** React Native (New Architecture, Fabric, TurboModules), Android (Java/Kotlin), iOS (Swift), CodePush, Hermes, FlashList
- **Backend:** Node.js, Express.js, REST API Design, GraphQL, WebSockets
- **Database:** MongoDB, Mongoose, PostgreSQL, Supabase
- **Cloud & DevOps:** AWS (RDS, S3, Lambda), Docker, Jenkins, CI/CD Pipelines, Fastlane
- **Tools:** Git, Jest, Firebase (FCM, Analytics, Crashlytics), Sentry, New Relic, Flipper, Storybook
- **AI Tools:** Claude, Cursor IDE, GitHub Copilot, ChatGPT, Prompt Engineering

EXPERIENCE

Planify Capital Limited – Gurgaon, India

June 2023 – Present

Sr. Software Developer (SDE-2)

- **Architected** the core Buy-Sell Dashboard for a high-traffic trading platform serving 50K+ daily traders; integrated **WebSockets** for real-time bid updates, contributing to a **20% increase in user conversion**.
- **Led** a React Native version migration (0.75 to 0.85) across three production apps, resolving breaking changes in native dependencies and adopting the **New Architecture**; integrated **CodePush** for OTA hot-patching.
- **Built and standardized** a shared React Native UI package library on **React Native Paper**, and authored **React Native and Next.js style guides** adopted across the engineering team, reducing UI inconsistency and new-hire ramp-up time.
- **Reduced** overall app size by **25%** (35MB to 26MB) through asset optimization and code-splitting, and improved render times by **35%** using FlashList and memoization, sustaining 60fps on low-end devices.
- **Built and maintained REST APIs** powering the buy-side dashboard, ticketing, traffic view, and homepage modules.
- **Own** end-to-end mobile release cycles across Google Play Store and Apple App Store, maintaining **99.9% crash-free sessions**.
- **Mentor** 4+ junior developers through structured PR reviews and codebase walkthroughs, reducing review cycle time by 30%.

Salescode.ai – Gurgaon, India

July 2021 – June 2023

Software Developer

- **Engineered** scalable mobile enterprise solutions for several clients across SaaS, e-commerce, and healthcare verticals; built reusable component libraries adopted across 50+ projects, accelerating feature delivery by **30%**.
- **Architected** a custom **React.js App Designer** tool that automated internal deployment workflows, reducing manual developer overhead by **70%** and enabling non-technical users to assemble app modules.
- **Migrated** 30K+ lines of legacy code to **TypeScript** and introduced unit testing with **Jest** (85% coverage), reducing runtime errors by 35%.
- **Wrote and maintained Jenkins CI/CD pipelines** for build and deployment automation.
- **Collaborated** with cross-functional teams (design, QA, product) to ship features from concept to production.

Internship Experience (Feb 2021 – July 2021): Check-in Pvt Ltd & Draggital IT Solutions – Engineered MERN stack modules for MVP products, reducing API response latencies by **25%** and fixing 15+ critical production bugs affecting 5K+ active users.

KEY PROJECTS

Planify Ecosystem (Next.js & React Native)

planify.in

2023 – Present

- Developed the corporate web platform using **Next.js** for SSR and SEO optimization, achieving a 90+ Lighthouse score; built the UI with a **styled-components** design system.
- Built a real-time trading engine handling 10K+ concurrent WebSocket connections, using **Supabase and AWS** (RDS, S3, Lambda) for scalable infrastructure.
- Built and maintained the app's **notification system** (Firebase Cloud Messaging) and implemented **universal and deep linking** for marketing campaigns, streamlining onboarding and reducing signup friction by 25%.
- Implemented multi-method authentication (JWT, email/password with cookie-based sessions, biometric login, OTP verification) across web and mobile.

Alpha AMC – AIF Fintech Ecosystem

alphaamc.com — [App Store link – to be added]

2022 – 2023

- Led full-stack development of the Alpha AMC web platform (**Next.js**) and mobile app for 2,000+ Alternative Investment Fund (AIF) managers and 50K+ retail investors.
- **Built the notification system from scratch** (Firebase Cloud Messaging) covering 4–5 categories including KYC status, sign-up/login events, and new research report alerts – the app's first such system.
- Implemented high-security onboarding flows with KYC/AML integrations, enabling 100+ funds to launch within Q1.

AIF Platform

[Website link – to be added] — [Play Store link – to be added]

2022 – 2023

- Led development of the AIF Platform, a distinct product within the Planify ecosystem offering [insert specific platform services/features here], built on the same **Next.js and React Native** stack as Alpha AMC.
- Reused the shared **React Native Paper**-based UI package library and built a dedicated **Tailwind CSS** component library for the platform's web app, maintaining design consistency across apps while supporting a distinct service offering.

Channel Kart Multibrand

Play Store

2021 – 2022

- Engineered a scalable B2B multi-brand mobile application supporting 500+ channel partners and 200K+ monthly orders, optimizing complex ordering and distribution workflows.
- Managed the end-to-end release pipeline for Google Play Store, maintaining a 4.5+ star rating and zero critical crashes through automated testing and staged rollouts.

Netflix-Inspired Technical Portfolio

krrahul.netlify.app

2024

- Developed a high-performance interactive web experience leveraging **React 18, Framer Motion, and lazy-loading**, achieving sub-2s page load times and a 98+ Lighthouse score.
- Showcased advanced CSS animations and performance optimization techniques, driving 50+ recruiter inquiries and contract offers.

NOTABLE ACHIEVEMENTS

- **Employee of the Month** (April 2024, March 2024) for exceptional delivery and ownership of high-impact trading modules.
- **Certificate of Appreciation** (Feb 2023, Sep 2022) for automating internal deployment workflows, saving 100+ engineering hours quarterly.

EDUCATION

Bachelor of Technology in Electronics & Communication Engineering

2016 – 2020

Mahavir Swami Institute of Technology (GGSIPU)
